

PROFESSIONAL SUMMARY

AI Engineer and Fullstack Developer experienced in building production-grade AI systems, autonomous agents, RAG pipelines, and scalable web applications using LangChain, LangGraph, Flask, Next.js, and Node.js. Strong background in LLM orchestration, NLP, backend systems, REST APIs, vector retrieval workflows, and AI-powered automation.

TECHNICAL SKILLS

- **Languages:** Python, JavaScript, SQL
- **Frontend:** React.js, Next.js, Flutter, Tailwind CSS
- **Backend & APIs:** Node.js, Express.js, Flask, FastAPI, REST APIs
- **AI / GenAI:** LangChain, LangGraph, MCP, RAG, AI Agents, NLP, PyTorch, LSTM, Vector Retrieval, Prompt Engineering
- **Databases:** PostgreSQL, MongoDB, MySQL, Supabase
- **Tools & Platforms:** Docker, Git, GitHub, Playwright, Gradio

EXPERIENCE

Fullstack Intern — Naiyo24

Flutter, React, PostgreSQL

Jun 2025 – Sep 2025

- Developed and integrated frontend modules with backend APIs for cross-platform accounting and financial management dashboards.
- Implemented secure authentication, session handling, and validation workflows for transaction-related operations.
- Optimized API communication and frontend state management to improve consistency across financial workflows.
- Collaborated with the engineering team to debug production issues and deliver scalable feature updates.

PROJECTS

TruthLens — AI Misinformation Detection & Fact-Checking Platform

Flask, Next.js, PyTorch, NLP, RAG, Docker, Groq

- Built a full-stack AI fact-checking platform supporting text and image-based misinformation analysis with AI-generated summaries and risk scoring.
- Developed a hybrid NLP pipeline using PyTorch LSTM, spaCy, Retrieval-Augmented Generation (RAG), and semantic evidence retrieval workflows.
- Integrated multi-source verification pipelines using Reddit analysis, web scraping, and reverse image search for contradiction detection.
- Designed scalable REST APIs and modular backend services for real-time AI inference workflows.

SideKick — Autonomous AI Agent Framework

LangGraph, LangChain, DeepSeek, Playwright, Serper, Gradio

GitHub Repository

- Built an autonomous browser-capable AI agent framework capable of iterative task execution using evaluator-agent feedback loops.
- Integrated LangGraph orchestration, browser automation, web search, Wikipedia tools, and Python execution pipelines.
- Implemented self-correcting agent workflows enabling autonomous planning, refinement, and multi-step reasoning.
- Developed secure sandbox-scoped tooling for controlled file persistence and execution environments.

ZaFlora — Production E-Commerce Platform

Node.js, Express.js, Supabase, Razorpay

Live Production System

- Built and deployed a production-ready e-commerce platform supporting authentication, order management and payment workflows.
- Integrated Razorpay payment gateway with secure transaction handling and verification pipelines.
- Implemented secure user authentication and inventory management workflows for operational scalability.

EDUCATION

University of Petroleum and Energy Studies (UPES), Dehradun

B.Tech in Computer Science and Engineering (Fullstack AI)

2022 – 2026

CERTIFICATIONS

- **AI Engineer Agentic Track: The Complete Agent & MCP Course** — Udemy
- **Complete Guide to Building, Deploying, and Optimizing Generative AI with LangChain and Hugging Face** — Udemy

ACHIEVEMENTS & LEADERSHIP

- **Open Source Contributions:** Contributed to GitHub repositories and resolved fullstack development issues during Hacktoberfest 2025.
- **CSI Core Member:** Organized hackathons and contributed to frontend systems for event management platforms.
